## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10 & 14-19, drawn to a parallel-link table, classified in class 5, subclass 601.
  - II. Claims 11-13, drawn to a tomographic imaging apparatus, classified in class 378, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the subcombination as claimed does not require the particulars of the combination as claimed because it does not require use for tomographic imaging. The subcombination has separate utility such as for any process other than tomographic imaging that would not require an image acquisition section, for example.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
